

Removal Candidates

Files and directories removed during the 2026-03-20 inventory review. **All items below were deleted on 2026-03-20 after user confirmation.** This document is retained as an audit trail.

Directories

Path	Reason	Pre-removal Action
gtihub-regos-installer/	Dead weight. Fully superseded by regos-installer/ (v2).	None needed — no unique content.
benchmark/	One-time PDF extraction benchmark. Results documented in regos-docs/Decision_Record.md.	Decision document created. Safe to remove.
RegOS_Integration_Package/	One-time deliverable. May be recreated in future.	None — JSON data copies exist in regos_setup/data/.

Root-Level Files

File	Reason
graphrag_filter.py	Root-level copy. Canonical version in regos_setup/functions/.
regulatory_thresholds.json	Root-level copy. Canonical version in regos_setup/data/.
neo4j_query_table_data_2026-1-15 (1).json	237 MB raw graph export. Canonical graph in regos_setup/data/chaptor_24_graph.json.
pdf_benchmark.py	Benchmark runner. Results documented in decision record. Remove with benchmark/.
RAG_Pipeline_Expansion_Mockup.html	One-time UI mockup. No longer relevant.
demo_reset.py	Root copy. Canonical in regos-installer/scripts/.
demo_show_records.py	Root copy. Canonical in regos-installer/scripts/.
demo_tamper.py	Root copy. Canonical in regos-installer/scripts/.
verify_hashes.py	Root copy. Canonical in regos-installer/scripts/.
diag_hash.py	Diagnostic artifact. No canonical use.
diag_hash2.py	Diagnostic artifact. No canonical use.

Already Handled

These items were moved rather than removed during the reorganization:

- n8n artifacts (email_preview.html, format_email_node_v3.js, parsed_response.html) -> moved to regos_setup/n8n/
- All root .docx/.xlsx/.pptx/.svg/.drawio files -> moved to regos-docs/
- Strategy documents -> moved to strategies/
- legal-chunking-dashboard/ -> renamed to APAS-Legal-PDF-Chunking-Dashboard/ (to be extracted to separate repo)

- `.env` -> already in `.gitignore`
